

SafeSpot™

COLLISION AVOIDANCE SYSTEM

A new, wireless collision avoidance system - SafeSpot™ reduces accidents in the workplace. Forklift accidents cost an estimated \$3.7 billion per year in the U.S. and are the cause of 20,000 serious injuries including 100 deaths. SafeSpot™ offers a simple, inexpensive solution that increases safety while ensuring OSHA compliance.

BENEFITS

- Distinguishes between people & forklifts
- Reduces false positives
- Increases warning time
- Installs easily
- Requires low maintenance
- Eliminates the need for workers to wear tags
- Works in blind spots and around corners
- Provides strong return on investment

HOW IT WORKS
